

Ultragen was established to offer general services in engineering consultation primarily in the refining, petrochemical, chemical and energy sectors. In 22 years, Ultragen has realised over 1500 projects with great success. For more information, visit our web site at www.ultragen.com. Following an increase in projects and in anticipation of substantial long-term growth in our workload, we are looking for a candidate for the following position:

JUNIOR DRAFTSMAN

Job Description:

Under the supervision of the Groupe Leader of the Drafting/Design team, the candidate shall:

- Draw charts and diagrams needed to achieve the mechanical and piping components of a project
- Translate various diagrams and corrections
- Prepare isometric plans for construction
- Adhere to the standards and procedures of the company
- Adhere to quality procedures of the company
- Visit sites and produce reports
- Prepare construction plans
- Auto verification for quality control
- Work as part of a multidisciplinary team

The Drafting/Design department works closely with various engineering departments as well as with clients. A major part of the workload is carried out only once the engineering projects have been detailed, but the department also collaborates on preliminary and conceptual studies.

Selection Criteria:

- DEC in mechanical engineering or professional training in industrial design
- Knowledge of AutoCAD, Bentley Autoplant, 3D Solidworks, and CATIA
- General knowledge of the piping industry would be beneficial
- Bilingual (French and English)
- Capacity and willingness to learn
- Own a vehicle in order to visit clients on site
- Respect and professionalism
- Good communication and interpersonal skills
- Team Synergy
- Technical excellence

Ultragen offers competitive salaries and many benefits
